

# HARU

## USER MANUAL

SUBIN JEONG, JOOWON LIM, HAKYEONG KIM, TIM BURKHART, MITCHELL ETZEL

Product Name:	Haru (하루)
Team Name:	One Day
Revision Number:	1
Revision Date:	07/25/2016

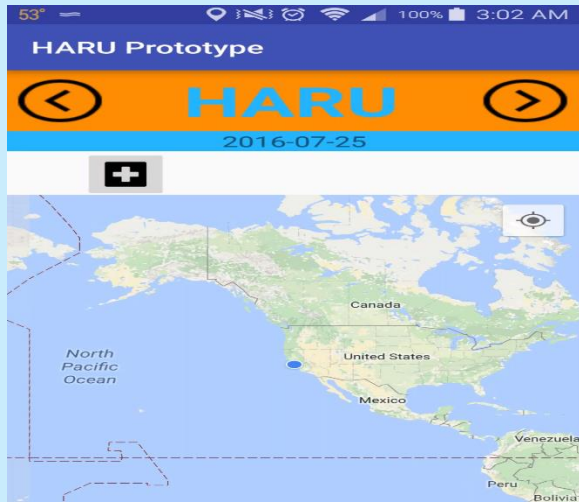

### FIRST STEPS

- Have Android Studio installed with all the Google SDKs
- Go to: <https://github.com/Grazioso-Haru/Haru>
- Download master branch
- Open Android Studio and press Open Project
- Navigate to where you have downloaded the master branch
- Select the Haru Prototype and press Open
- Attach suitable Android phone
- Build/Run Haru Prototype on phone

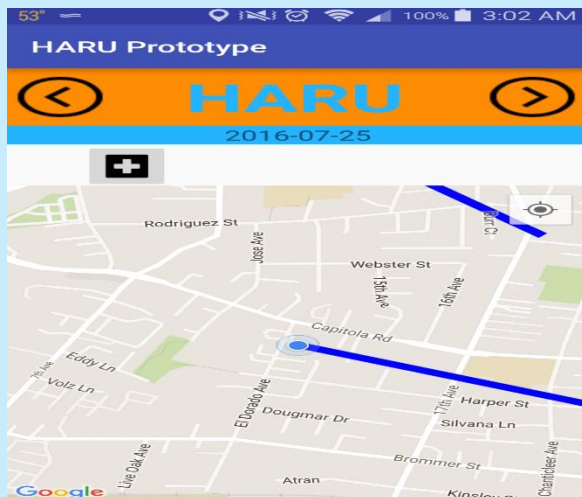

### THINGS TO KNOW

- Haru builds tracks with GPS data that it collects in the background as you live your day
- You add pins to this track to keep a diary of what you did throughout the day
- You have a page to review all the comments you have made in one day

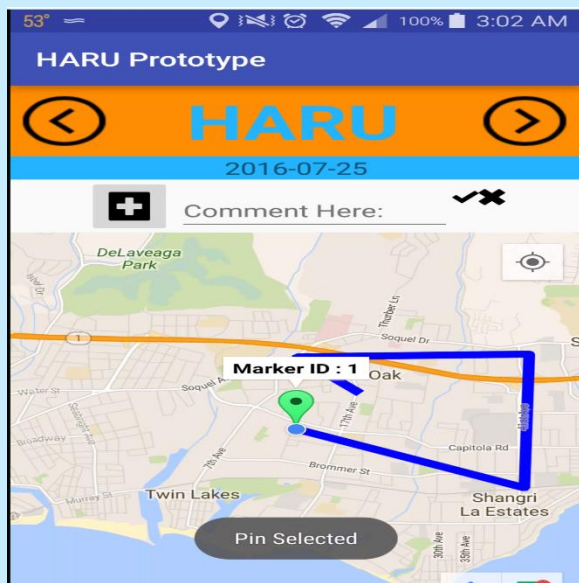

## HARU NAVIGATION

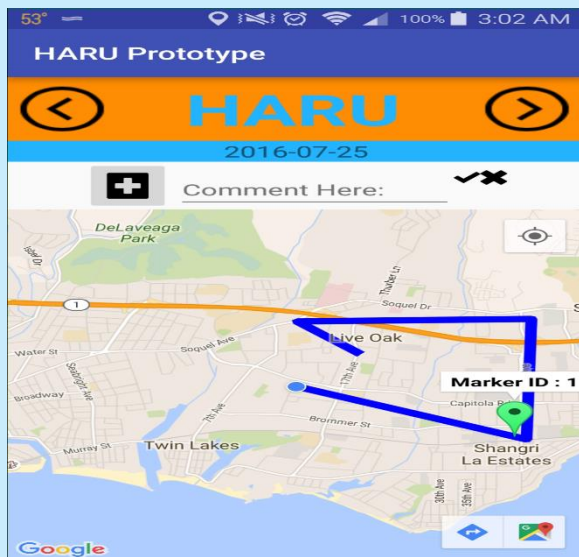

- Upon opening Haru press the Compass Icon in the upper right hand corner of the map to zoom in to your location

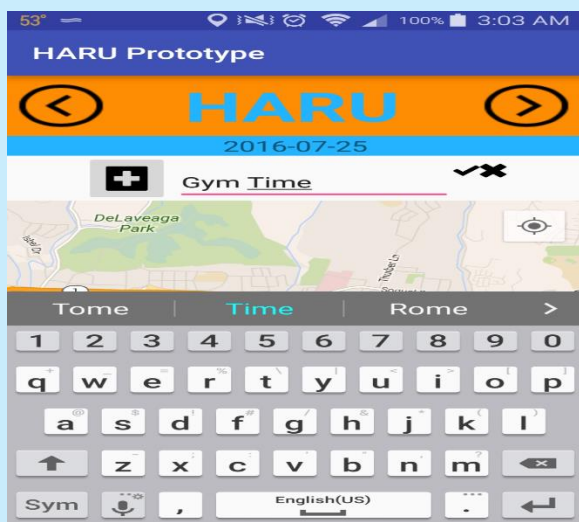

- To add a Personal Pin, press the black addition sign above the map and then tap on it

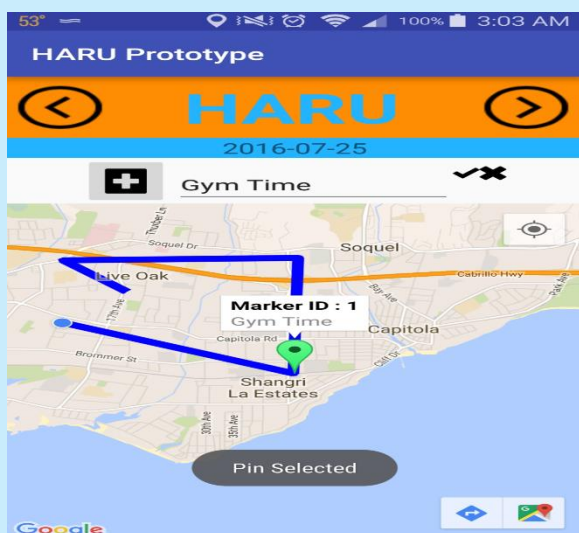

- If you tap and hold the pin you can move it anywhere on the map you want it to be

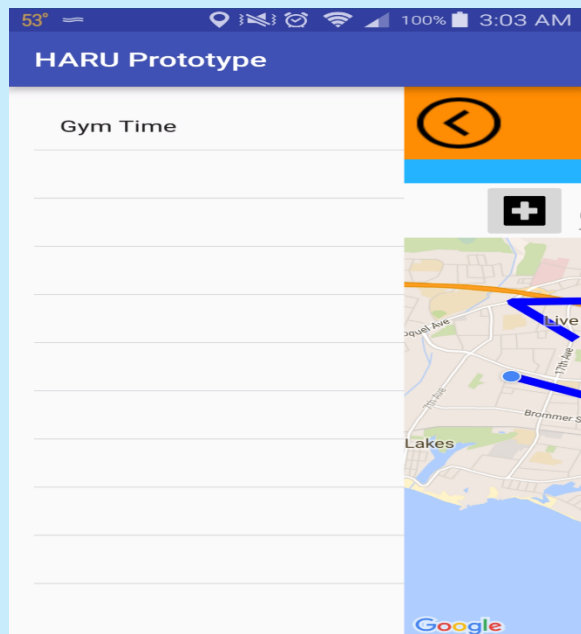

- Tap on the Comment Textbox to input your personal statement onto the pin

- Once done press the black check button and press back on your phone to get out of editing mode

- Tap the pin again to see the new message and then tap the blue Haru emblem to sync the new pin

- You can now see the new comment on your Diary page.
