HARU

WORKING PROTOTYPE REPORT

SUBIN JEONG, JOOWON LIM, HAKYEONG KIM, TIM BURKHART, MITCHELL ETZEL

Product Name: Haru (하류

Team Name: One Day

Revision Number: 1

Revision Date: 07/25/2016

KNOWN ISSUES

Most functions work but occasional whole app crashes have been experienced, usually only a restart or rebuild of the application is necessary. The location of this fault in unknown and we are searching for a possible method of fixing this.

The background processes like GPS data collection, track creation, and track coloring are barely a week old and liable to not function at 100%. There is no specific failure with this said but with one week to cobble together multiple separate parts it's possible to have new bugs pop up during a demonstration that we haven't ran in to before. There are actions we could take to fix these but we would need more time.
